

COMPANY OVERVIEW

Sterling Signs delivers professional sign manufacturing, installation, and maintenance services across commercial and public sectors from Victorville, California. Founded in 2020 to meet growing regional demand for high-quality signage, Sterling Signs combines modern digital displays, custom printed media, and durable fixture fabrication to support facility branding, wayfinding, and visual communications. Licensed as an electrical sign contractor (CA License 1071991) and fully insured, Sterling Signs serves retail, institutional, municipal, and corporate clients with dependable results and responsive service.

CAPABILITIES

Sterling Signs offers a full suite of signage services based on industry-leading technology and fabrication practices. Digital displays incorporate advanced LED modules suitable for interior and exterior environments, and UV flatbed printing produces vivid, detailed graphics on metal, glass, and specialty substrates. Custom displays and fixtures are designed in partnership with architects, designers, and general contractors, ensuring cohesive branding and functional integration. Installation services cover a broad range of sign types, from vinyl graphics and channel letters to high-rise pylons, supported by experienced technicians. Ongoing lighting and maintenance programs help clients maximize the lifespan of installed signage with options from one-time servicing to comprehensive upkeep contracts in compliance with Title 24 energy efficiency standards.
